

## ICT 4103: Simulation and Modeling

WEEK I - XII

# Course Completion Helps

**Ziaur Rahman, PhD | Systems Security Lab**

Department of Information and Communication Technology (ICT), MBSTU

**SSL**  
Systems Security Lab

Learning  
Management  
System (LMS):

Google Classroom

5 May 2024, Tangail-1902

# Course Outlines

1. Introduction To Modeling and Simulation (1-2L)
2. Random Number & Monte Carlo Method (3-6L)
3. Statistics for Modelling and Simulation (7-10L)
4. Statistical Distributions (11-14L)
5. Probability Distributions (15-18L)
6. Modelling Methods (19-21L)
7. Queuing Models and Experiments (22-25L)
8. Simulation Software (26-28L)
9. Data Coding and Screening (29-30L)

Total = 42 (30 Lects. + 4 Class Tests/Quiz + 8 Review Lects.)

# Introduction To Modeling and Simulation

# 1: Introduction To Modeling & Simulation

- 1) Modelling and Simulation Concepts
- 2) Definitions and What is Modelling and Simulation?
- 3) Types of Models
- 4) Advantages and Disadvantages of Simulation
- 5) Advantages of Using Models
- 6) Systems and System Environment
- 7) Components of a System
- 8) Discrete and Continuous Systems
- 9) Areas of Application
- 10) Modelling Procedure (Steps with Fig)

# 2: Random Number

- 1) Preliminaries: Modular Arithmetic Basics
- 2) Properties Of Random Numbers
- 3) Techniques For Generating Random Numbers
- 4) Linear Congruential Method
